Education

Nigerian Army University Biu (NAUB)
BSc Software Engineering

Nov 2019 - Expected 2023

Skills

Programming Languages:	JavaScript, Python, HTML/CSS
Frameworks:	React & NextJS
Databases:	Firebase Firestore
CSS Frameworks:	Tailwindcss, Chakra-ui, Bootstrap, Style-Component

Work Experience

Frontend Engineering Contract
Umfahad MT

Feb 2021 - March 2021

Helped in building Web Application for self-services. I worked in frontend part, building components, styling and giving a beautiful look.

- Used HTML/CSS, JavaScript and Bootstrap

Frontend Web Developer Part-time
Cytone

Jun 2021 – Sep 2021

Working as a part-time frontend developer at Cytone, I worked when I was assign to, because I'm in Collage and it was a part time.

- Worked with React for building user-interface of a web apps.

Projects

Gmail Clone - React, JavaScript (ES6), Redux, Firebase, Material-ui

[clone-50bd1.web.app](#)

Created Gmail app with firebase firestore for saving messages, and Google provider for signing. All from firebase services.

Netflix App - React, Node.js, TMDB API, JavaScript (ES6)

[netflix-clone-c9490.web.app](#)

Created Netflix App with TMDB's API for movies cover/Posters from their database and it has little bit responsiveness although I didn't work pretty much on that :)

- Use Firebase Hosting as hosting provider

Amazon - NextJS, Nodejs, Firebase, Tailwindcss, Material-ui, Next-Auth, Stripe

Built amazon application with ecommerce functionality backend and frontend. Used Stripe for payment method and firestore for saving users data.

Not hosted yet, because I want to add Payment Stripe using Firebase Stripe checkout.
